- 3-dimensional form based on the latest developments in moulded plywood technique using ordinary plywood
- Variety of seat and base colours and finishes
- Suitable for a wide variety of private and public environments
- Qualified for contract use

SOFT EDGE 72 STOOL

DESIGN BY ISKOS-BERLIN

Iskos-Berlin's Soft Edge series features an organically shaped design, blending strong curves with extreme lightness to create a minimalistic design that optimises human-centric comfort. Featuring a wooden seat and legs in a variety of finishes, the Soft Edge 72 Stool is a short variant with the same seamless, unified expression that offers uncluttered aesthetics with a feeling of lightness. Its strength and functionality ensure years of everyday use in a wide range of public and private environments – from corporate spaces and cafés to home environments.

Iskos-Berlin is the design partnership of Aleksei Iskos and Boris Berlin, which was founded in 2010 and is based in Copenhagen. Together, they work across the fields of industrial, furniture and graphic design. The pair previously worked together at Komplot Design, Berlin was a founding member in 1987, with Iskos joining the practice in 1999. Berlin (b. 1958) is from St. Petersburg, Russia, and is a graduate of the city's Institute of Applied Arts. While Iskos (b. 1965) is from Kharkov, Ukraine, and has studied architecture, engineering and industrial design in both Ukraine and Denmark. Their approach is to “see design as an art of storytelling” and they pay particular attention to the materiality of objects, often letting this define the language of their designs. Their exploratory nature often results in products that utilise new technologies and materials. For HAY, Iskos-Berlin have created the Soft Edge series of chairs and stools, a design created in the knowledge that there is no ultimate sitting posture, rather that our natural state is one of constant dynamic movement.

Supports a healthy indoor environment.
Confirms to ANSI/BIFMA standards.

EN TEST
EN 16139 - L2
Non-domestic seating

SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC™-certified wood (FSC-C148805), and bio-based foam that helps lower our products' overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
